

T IoT

Deutsche Telekom and T-Mobile U.S.
unite to simplify the global IoT experience

connect. digitize. get ahead.

The strength in our networks, and our willingness to support and solve customer needs with urgency come together.

The US and EU 5G network leaders provide best-in-class IoT solution and experience, worldwide — as well as the cellular connectivity options needed today with the freedom to roam globally, for a seamless evolution to the fastest 5G network tomorrow.

Together we offer the **simplicity** and **flexibility** of building an IoT solution tailored for multinational businesses including harmonized or traditional rate plans, IoT Hub single pane of glass device management and select Value Add Services.

Combine the strength of our global network footprint with the leading capabilities of our IoT Hub to tailor a global IoT solution that can help you easily manage costs and improve efficiencies today for growth tomorrow.

Global Value Proposition

Truly Global Partner

- Business Value: Innovative pricing for IoT services across US & EU
- Single global team (sales & services) — one care structure, global SLAs, global billing or global usage reporting with local billing

Native Transatlantic Network

- Network: Global connectivity with unrivaled transatlantic native 5G networks for worldwide access freedom
- Complemented with a truly global footprint

Simple to do Business with

- Cohesive Customer Experience with no borders or boundaries
- IoT-as-a-Service (commercial model to support)
- Visibility across all global assets
